The Flexi sloth with hooked claws - hang it from a plant or a string!
Or just let it sloth around, your choice. It's adorable both ways.

The claws can be snapped into place. The face has to be printed with support and should fit snugly, still easily removable. That way you could design various exchangeable faces, for example a sleepy face.

It should be able to hang from 4,5mm thick cylindrical objects and smaller.

The face is painted on with regular acrylic paints. Here's the reference:

Happy printing and don't forget to post your makes!
